❖ Summary of the industry in which our Company operates:

Oil Industry:

Most of the oilseeds are cultivated on marginal land and are dependent on rainfall and other climatic conditions. The other dominant feature which has had significant impact on the present status of edible oilseeds/oil industry has been the program of liberalization under which the Government's economic policy allowing greater freedom to the open market and encourages healthy competition and self regulation rather than protection and control. Controls and regulations have been relaxed resulting in a highly competitive market dominated by both domestic and multinational players

The country has to rely on imports to meet the gap between demand and supply. Import of edible oils is under Open General License (OGL). In order to harmonize the interests of farmers, processors and consumers, Government reviews the duty structure of edible oils from time to time. With effect from 14.06.2018, the import duty on all crude and refined edible oils, except Palm oil and Olive oil was raised to 35% and 45% respectively while the import duty on Olive oil was increased to 40%. With effect from 01.01.2020, the import duty on Crude and Refined Palm Oil was revised to 37.5% and 45% respectively. With effect from 08.01.2020, import policy of Refined Palm Oil is amended from ‘free’ to ‘Restricted’ category. With effect from 27.11.2020, the import duty on crude palm oil was revised from 37.5% to 27.5%.

In order to ensure availability of edible oil in the country, export of edible oil has been banned w.e.f. 17.03.2008, which was extended from time to time. With effect from 06.02.2015, export of ricebran oil in bulk has been permitted. With effect from 27.03.2017, export of groundnut oil, sesame oil, soyabean oil and maize (corn) oil has been permitted. With effect from 06.04.2018, export of all edible oils except mustard oil was made free without quantitative ceiling; pack size etc, till further orders. Export of mustard oil is permitted in packs of up to 5 Kg with a Minimum Export Price (MEP) of USD 900 per MT.

Animal Feed Industry:

Animal feed is way more than just sustenance for livestock, poultry, and aquaculture - it is the cornerstone of their growth, health, and productivity as well. And now with a burgeoning population and changing dietary habits, it holds huge potential to support future generations and their growing demands of nutrition.

With an estimated value of US\$ 501.9 billion in 2022, the global animal feed market is expected to grow at a CAGR of 3.3%. India being the fourth-largest producer of animal feed, accounted for a US\$ 11.66 billion feed market in 2022. The analysis run by TPCI's research team reveals opportunity areas for expanding exports.

Animal feed is the food given to domestic animals in the course of animal husbandry. Globally, the feed industry serves a variety of animals including poultry, dairy (cattle, calf, and beef), aquatic/marine, pig, pets etc. The feed demand for different animals varies with respect to socio-cultural dynamics, eating habits and economic importance of animals in the region.

India is glaring at a critical fodder problem over the past few years, according to market reports. According to a recent coverage, India is facing a major challenge in terms of producing adequate feed and fodder for its livestock, given its shrinking land resource. Erratic fodder supply during summer/ drought creates a further gap in the supply chain. The deficit in green fodder is estimated at 11.24%. Currently, fodder is being cultivated on 8.4 million hectares (nearly 4% of gross cropped area), whereas experts suggest a share of 14-17%.

In fact, animal feed is a huge and diverse industry with lucrative growth opportunities across end user segments led by growing demand. TPCI's research team has undertaken a deep dive into the animal feed industry to ascertain critical growth opportunities for Indian exporters.

INTERNAL RISK FACTORS

A. Business Related Risks

1. ***Our Company, Promoter Group and Group Entities are parties to certain legal proceedings. Any adverse decision in such proceedings may have a material adverse effect on our business, result of operations and financial conditions.***

2. ***Increase in the prices of our raw material may have an adverse effect on our business.***

We are primarily engaged in the business of Manufacturing of Maize oil (Non-edible) and Maize Cake (Cattle Feed). The business process involves purchase of the Maize Germ, then mechanized expelling, packaging and selling of the Maize Oil and Maize Cake.

Our principal raw material used in the manufacture of Maize cake and Maize oil comprises mainly Maize Germs. Our company also procures Maize Poha, Maize Bran, Sludge Kitu which acts as a binding agent for production of maize cake. We procure all of our raw materials indigenously. The raw materials required for manufacturing process are stored within the factory premises itself. The company manufactures Maize cake (i.e., Cattle Feed) & Maize Oil which are produced by expeller pressing of raw materials. Our Raw Materials are purchased from various states in India.

An increase in the price of the raw materials may increase our manufacturing expenses resulting in the overall cost of our products. The increase in the cost of our manufactured products may not be acceptable to the existing customers and this may lead to losing our customer base. This may lead to an adverse financial impact on the revenue from operations of the Company.

If we cannot fully offset increases in raw material and component prices with increases in the prices for our products, we will experience lower margins, which will have a material adverse effect on our results of operations and financial condition. In the absence of any long-term contracts, we are also exposed to the risk of unavailability of certain raw materials and components in desired quantities and qualities, in a timely manner or at all.

3. *The company's business is dependent on certain suppliers and the loss of one or more of them would have a material adverse effect on the business.*

A substantial portion of the company's purchases has been dependent upon a few suppliers. Our inability to obtain raw material in a timely manner, in sufficient quantities could adversely affect our operations, financial condition and/or profitability. We depend on a number of suppliers, for procurement of raw materials required for manufacturing our products. In financial year ended March 31, 2023, March 31, 2022 and March 31, 2021, top ten suppliers accounted for 82.23%, 74.48% and 76.87% of our total purchases respectively. We have not entered into long term contracts with our suppliers and prices for raw materials are normally based on the quotes we receive from various suppliers/brokers. Inadequate and unavailability / substandard quality of the raw materials used in the manufacture of our products, could have a material adverse effect our business. Further, any discontinuation of production by these suppliers or a failure of these suppliers to adhere to the delivery schedule or the required quality and quantity could hamper our manufacturing schedule. There can be no assurance that strong demand, capacity limitations or other problems experienced by our suppliers will not result in occasional shortages or delays in their supply of raw materials to us. Further, we cannot assure you that our suppliers will continue to be associated with us on reasonable terms, or at all. Since our suppliers are not contractually bound to deal with us exclusively, we may face the risk of our competitors offering better terms to such suppliers, which may cause them to cater to our competitors alongside. In the event that we fail to secure sufficient quantities of such raw materials from our suppliers at acceptable quality and prices in a timely manner, our business, financial performance and cash flows may be adversely affected.

4. *Substantial portion of our revenues has been dependent upon few customers. The loss of any one or more of our major customers would have a material effect on our business operations and profitability.*

A portion of the Company's revenues has been dependent upon a few customers. For the financial year ended March 31, 2023, March 31, 2022 and March 31, 2021, our top ten customers accounted for approximately 62.42%, 68.44% and 75.59% of our revenue from operations. However, the loss of any significant customer would have a material effect on our financial results.

Our business from customers is dependent on our continuing relationship with such customers, the quality of our products and our ability to deliver on their orders, and there can be no assurance that such customers will continue to do business with us in the future on commercially acceptable terms or at all. However, in case of any change in the buying pattern of our end users or disassociation of major customers can adversely affect our business or if our customers do not continue to purchase products from us, or reduce the volume of products purchased from us, our business prospects, results of operations and financial condition may be adversely affected. Further, loss of or interruption of work by, a significant customer or a number of significant customers or the inability to procure new orders on a regular basis or at all may have an adverse effect on our revenues, cash flows and operations.

While we are constantly striving to increase our customer base and reduce dependence on any particular customer, there is no assurance that we will be able to broaden our customer base in any future periods or that our business or results of operations will not be adversely affected by a reduction in demand or cessation of our relationship with any of our major customers.

5. *Any reduction in the demand for our products could lead to underutilisation of our manufacturing capacity.*

We face the risk that our customers might not place any order or might even cancel existing orders. Cancellations, of orders by our customers could adversely affect our results of operations by reducing our sales volume leading to a reduced utilization of our existing manufacturing capacity. Further, we make significant decisions, including determining the levels of business that we will seek and accept, production schedules, personnel requirements and other resource requirements, based on our estimates of customer orders. The changes in demand of our products could reduce our ability to estimate accurately future customer requirements, make it difficult to schedule production and lead to over production and utilization of our manufacturing capacity for a particular product. The requirements of our customers are not restricted to one type of product and therefore variations in demand for certain types of products also requires us to make customizations. This may lead to over production of certain products and under production of some other products resulting in a complete mismatch of capacity and capacity utilization. Any such mismatch leading to over or under utilization of our manufacturing facilities could adversely affect our business, results of operations, financial condition and cash flows.

6. *If we are unable to successfully implement our proposed expansion plans; our results of operations and financial condition could be adversely affected.*

Our Company is planning to build scale and expand its production capacity. From the Net Proceeds of the Issue, we will be deploying funds for purchase of additional plant and machinery. These expansion plans and business growth could strain our managerial, operational and financial resources. Our ability to manage future growth will depend on our ability to continue to implement and improve operational, financial and management information systems on a timely basis and to attract, expand, train, motivate, retain and manage our workforce.

We cannot assure you that our personnel, systems, procedures and controls will be adequate to support our future growth. Failure to effectively manage our expansion may lead to increased costs and reduced profitability and may adversely affect our growth prospects. Any of these factors may cause us to delay, modify or forego some or all aspects of our expansion plans. Further, there can be no assurance that we will be able to execute our strategies on time and within the budget estimated by the Company. In addition, our expansion plans have not been appraised by any independent or third-party agency, and accordingly, in the absence of such independent appraisal, our expansion plans may be subject to change based on various factors which are beyond our control.

7. *Our Company is yet to place orders for purchase of plant and machinery. Any delay in placing orders or procurement of such plant and machinery may delay the schedule of implementation and possibly increase the cost of commencing operations.*

Our Company has received third party quotations of ₹ 184.33 lakhs for the plant and machinery from third party vendors which are proposed to be installed at our existing manufacturing unit situated at R. S. No. 162, Rajkot Jamnagar Highway, Near Khandheri Stadium, Vill. Naranka, Tal. Paddhari, Rajkot, Gujarat, 360110, India. Although, we have identified the type of machinery proposed to be purchased from the Net Proceeds. However, we have not placed orders for any of the plant and machinery proposed to be purchased from the Net Proceeds. The cost of the proposed purchase of plant and machinery is based on the quotations received from third party vendors. Such quotations are valid for a certain period of time and may be subject to revisions, and other commercial and technical factors and the estimates taken from online/e-commerce platforms are subject to fluctuations. For details, please refer to the chapter titled “*Objects of the Issue*” beginning on page 70 of this Draft Prospectus.

We cannot assure that we will be able to procure the plant and machinery in a timely manner and at the same price at which the quotations have been received. In the event of any delay in placing the orders, or an escalation in the cost of purchase of plant and machinery or in the event the vendors are not able to provide the plant and machinery in a timely manner, or at all, we may encounter time and cost overruns in expanding the capacity of the Manufacturing Facility. Further, if we are unable to procure machinery from the vendors from whom we have procured quotations, we cannot assure you that we may be able to identify alternative vendors to provide us with the machinery which satisfy our requirements at acceptable prices. Our inability to procure the machinery at acceptable prices or in a timely manner, may result in an increase in capital expenditure, the proposed schedule implementation and deployment of the Net Proceeds may be extended or may vary accordingly, thereby resulting in an adverse effect on our business, prospects and results of operations.

8. *The availability of look-alikes, counterfeit products, primarily in our domestic markets, manufactured by other companies and passed off as our products, could adversely affect our goodwill and results of operations.*

We are exposed to the risk that certain entities in India where our products are marketed, could pass off their products as ours to create look alike and counterfeit products. For example, certain entities could create spurious and pirated products. The measures we take to protect our brands and other intellectual property include relying on Indian laws and initiating legal proceedings, may not be adequate to prevent unauthorised use of them by third parties. Furthermore, the application of laws governing intellectual property rights in India is uncertain and evolving and could involve substantial risks to us. Detecting and protecting against the unauthorised use of our products, technology and proprietary rights is expensive, difficult and, in some cases, impossible. The proliferation of unauthorised copies of our products, and the time lost in defending claims and complaints about spurious products could decrease the revenue we receive from our products and have a material adverse effect on our reputation, business, financial condition and results of operations.

9. ***The improper handling, processing or storage of our products or raw materials, or spoilage of and damage to such products or raw materials, or any real or perceived contamination in our products or raw materials, could subject us to regulatory action, damage our reputation and have an adverse effect on our business, results of operations and financial condition.***

Our products and raw materials are subject to risks such as contamination, adulteration etc. during their manufacture, transport or storage. Although, our Raw Materials i.e. Maize Germs and our product Maize Cakes are tested, we cannot assure you that the tests conducted by us will be accurate at all times. Any actual or alleged contamination of our products or raw materials could damage our reputation, adversely affect our sales and result in legal proceedings being initiated against us, irrespective of whether such allegations have any factual basis. However, our Company has not faced any instance of spoilage of and damage to such products or raw materials, or any real or perceived contamination in our products or raw materials which had material impact on the financial and result of operations of our Company. Any allegation relating to, or the discovery of, unauthorised contaminants in our products or raw materials processed by us, which causes or is alleged to cause injury or illness, allegations that our products were not produced in accordance with our customer's specifications and/or have not performed adequately, even where food safety or other product safety is not a concern could damage our reputation, adversely affect our sales and may cause product liability or other legal proceedings being initiated against us by our customers, irrespective of whether such allegations have any factual basis. We may also be subject to regulatory action and mandatory product recalls. We cannot assure you that we will not be subject to such product liability claims in the future, whether or not legitimate, or product recalls, whether voluntary or mandatory. Defending such claims or regulatory action could be time-consuming and may also result in unexpected expenditures, and our reputation, business, financial condition, cash flows and results of operations may be adversely affected.

10. ***Our inability to manage our inventory and foresee accurate demand for our products for a future period may adversely affect our reputation, business, results of operation and our financial performance.***

The estimations on demands of our products are typically based on our projections, inventory levels, our understanding of the anticipation of consumption and spending by our consumers. If we overestimate demand for our products, we may face difficulty on storage of such products due to lower shelf life and complications with respect to storage of perishable products. Further, if we are unable to provide our products to our consumers due to any disruptions of our manufacturing facilities or shortage of raw materials, we may incur the risk of customers choosing other products over our products. While we closely monitor our inventory requirements for our product, we may be exposed to various risks including the aforementioned risks. All of these factors could adversely affect our reputation, business, results of operation and our financial performance.

11. ***Our operations are subject to high working capital requirements. If we are unable to generate sufficient cash flows to allow us to make required payments, there may be an adverse effect on our results of operations.***

Our business requires significant amount of working capital and major portion of our working capital is utilized towards debtors and inventories. Our Trade Receivables for the financial year March 31, 2023, March 31, 2022, March 31, 2021 were ₹ 713.07 lakhs, ₹ 639.15 lakhs and ₹ 713.46 lakhs respectively and our inventories for the financial year March 31, 2023, March 31, 2022, March 31, 2021 were ₹ 2482.55 lakhs, ₹ 2254.86 lakhs and ₹ 1540.01 lakhs respectively.

The results of operations of our business are dependent on our ability to effectively manage our inventory and trade receivables. To effectively manage our trade receivables, we must be able to accurately evaluate the credit worthiness of our customers and ensure that suitable terms and conditions are given to them in order to ensure our continued relationship with them. However, if our management fails to accurately evaluate the terms and conditions with our customers, it may lead to write-offs bad debts and/ or delay in recoveries which could lead to a liquidity crunch, thereby adversely affecting our business and results of operations. A liquidity crunch may also result in increased working capital borrowings and, consequently, higher finance cost which will adversely impact our profitability.

Our inability to maintain sufficient cash flow, credit facility and other sourcing of funding, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations. In the event we are not able to recover our dues from our trade receivables or sell our inventory, we may not be able to maintain our Sales level and thus adversely affecting our financial health.

For further details of working capital requirements, please refer to the chapter titled "***Objects of the Issue***" on page 70 of the Draft Prospectus.

12. *We have only one manufacturing facility.*

Our manufacturing facility is located at R. S. No. 162, Rajkot Jamnagar Highway, Near Khandheri Stadium, Vill. Naranka, Tal. Paddhari, Rajkot, Gujarat, 360110, India. As a result, any local social unrest, natural disaster, or breakdown of services and utilities in that area could have a material adverse effect on the business, financial position, and results of our operations. Our manufacturing facility is subject to operating risks, such as the breakdown or failure of equipment, power supply or processes, performance below expected levels of output, efficiency, obsolescence, labour disputes, strikes, lock-outs etc. In the event that we are forced to shut down our manufacturing facility for a significant period of time, it would have a material adverse effect on our earnings, our other results of operations, and our financial condition as a whole.

13. *Delays or defaults in customer payments could adversely affect our financial condition.*

We are exposed to payment delays and/or defaults by our customers and our financial position and financial performance are dependent on the creditworthiness of our customers. Further, we may not receive advance payment from our customers after signing the purchase orders. Delays in customers' payments may require us to make a working capital investment. If a customer defaults in making payments where we have devoted significant resources or where we have invested significant resources is delayed, cancelled, or does not proceed to completion, it could have an adverse effect on our operating results. For the Fiscal ending March 31, 2023, 2022 and 2021, our trade receivables were ₹ 713.07 lakhs, ₹ 639.15 lakhs and ₹ 713.46 lakhs, respectively. However, in the past, our Company has not faced any such instance of default but there is no guarantee that the timeliness of all or any part of our customers' payments and whether they will be able to fulfil their obligations, which may arise from their financial difficulties, cash flow difficulties, deterioration in their business performance, or a downturn in the global economy. If such events or circumstances occur, our financial performance and our operating cash flows may be adversely affected.

14. *Our success depends on stable and reliable logistics and transportation infrastructure. Disruption of logistics and transportation services could impair our ability to deliver our products to our customers and/ or increase our transportation costs, which may adversely affect our operations:*

We utilize third party transportation services by road for procurement of raw materials and supply of our products and from/ to our suppliers and customers. Transportation by road involves risks, including, collision, grounding, storm, fire, explosion, lightning, political instability, availability of transportation for our imports and operating restrictions/ lockdown consequent to outbreak of infectious diseases, such as the COVID-19 pandemic. Any delay or disruption caused to the transportation of materials could adversely impact our ability to procure the materials as well as to meet the delivery schedule of the customers in an economical manner. To ensure timely delivery of our products, we may also be required to maintain relatively high level of inventory of our products and this may also resultantly increase our cost.

In addition, any compensation received from insurers or third-party transportation providers may be insufficient to cover the cost of any delays and will not repair damage to our relationships with our affected customers. We may also be affected by an increase in fuel costs, as it will have a corresponding impact on transportation charges levied by our third-party transportation providers. This could require us to expend considerable resources in addressing our distribution requirements, including by way of absorbing these excess transportation charges to maintain our selling price, which could adversely affect our results of operations, or passing these charges on to our customers, which could adversely affect demand for our products.

15. *Our business is subject to seasonal and other fluctuations that may affect our cash flows and business operations.*

Our Production and products are impacted by seasonal variations, which may cause our revenues and profit to vary significantly between different quarters in a Fiscal. Our Raw Material i.e. Maize Germs which is the endosperm of Maize grain. Maize is principally grown in two seasons i.e. rainy (kharif) and winter (rabi). Maize which is available during harvesting period is the finest for our production due to less in free fatty acids and low in cost of procurement of maize. Typically, we see an increase in our business during harvesting seasons. As a result, our revenue and profits may vary significantly during different periods and certain periods may not be indicative of our financial position for a full financial year and may be significantly below the expectations of the market, analysts and investors. Therefore, our results of operations and cash flows across quarters in a Fiscal may not be comparable and any such comparisons may not be meaningful, or may not be indicative of our annual financial results or our results in any future quarters or periods.

Our business and operations may also be affected by heavy or sustained rainfalls or other extreme weather conditions such as cyclones could result in delays or disruptions to our operations and cause severe damages to our premises and equipment. This may result in reduce our productivity and delay our delivering of our products. During periods of curtailed activity due to adverse weather conditions, we may continue to incur operating expenses and our order related activities may be delayed or reduced. Adverse seasonal developments may also require the evacuation of personnel, suspension or curtailment of operations, resulting in delays in the delivery of products etc.

- 16. *We are subject to certain government regulation and if we fail to obtain, maintain or renew our statutory and regulatory licenses, permits and approvals required to operate our business, our business and results of operations may be adversely affected.***

Our operations are subject to certain government regulation and we are required to obtain and maintain a number of statutory and regulatory permits and approvals under central, state and local government rules in India such as Factory License, Fire license, license under Consent to operate from pollution control board, legal metrology etc., generally for carrying out our business. For details of approvals relating to our business and operations, see “**Government and Other Approvals**” on page 223 of this Draft Prospectus. Some of these approvals are granted for a limited duration and require renewal. Further, while we have applied for amendment in some of these approvals, we cannot assure you that such approvals will be issued or granted to us in a timely manner, or at all. We cannot assure you that we will be able to obtain such consent in a timely manner. If we do not receive such approvals or are not able to renew the approvals in a timely manner, our business and operations may be adversely affected. The approvals required by our Company are subject to numerous conditions and we cannot assure you that these would not be suspended or revoked in the event of non-compliance or alleged non-compliance with any terms or conditions thereof, or pursuant to any regulatory action. If there is any failure by us to comply with the applicable regulations or if the regulations governing our business are amended, we may incur increased costs, be subject to penalties, have our approvals and permits revoked or suffer a disruption in our operations, any of which could adversely affect our business.

- 17. *We operate in an industry with several competitors and we may fail to compete successfully against existing or new competitors, which may reduce the demand for our products and services which may lead to reduced prices, operating margins, profits and further result in loss of market share across product categories.***

We operate in an industry with several competitors, and face competition from domestic competitors in the markets in which we operate. It is possible that some of our existing and potential competitors may have greater brand recognition in India or globally, longer operating histories, greater financial, research, distribution and technological resources, product development, sales and marketing, more experienced management, access to a cheaper cost of capital and other resources than we do. Some of our competitors may have lower costs, or be able to offer lower prices and a larger variety of products in order to gain market share. If market prices are substantially reduced by our competitors in the respective markets, our business in those markets could be adversely affected. Our competitors may also make acquisitions or establish cooperative or other strategic relationships, among themselves or with third parties, thereby increasing their ability to address the needs of our targeted customers and offering lower cost products and services than we do which may have a negative effect on our sales. Further, new competitors may emerge at any time. Further, some of our competitors may have the ability to devote greater resources to the marketing, advertising and product endorsement. As a result, these competitors may be better equipped to influence consumer preferences or otherwise increase their market share. Increased competition could result in, among other things, a slowdown in the growth of our corporate customers, a loss of our market share, price reductions, reduced demand for our products, reductions in revenues and reduced margins and profitability.

- 18. *We majorly sell our products in Gujarat and any adverse developments affecting our operations in these regions could have an adverse impact on our revenue and results of operations.***

We majorly sell our products in the state of Gujarat. Such geographical concentration of our business in these regions heightens our exposure to adverse developments related to competition, as well as economic and demographic changes in these regions which may adversely affect our business prospects, financial conditions and results of operations. Factors such as competition, culture, regulatory regimes, business practices and customs, industry needs, transportation, in other markets where we may expand our operations may differ from those in which we are currently offering. In addition, as we enter new markets and geographical areas, we are likely to compete not only with national players, but also local players who might have an established local presence, are more familiar with local regulations, business practices and industry needs, have stronger relationships with local distributors, dealers, relevant government authorities, and are in a stronger financial position than us, all of which may give them a competitive advantage over us. Our inability to expand into areas outside [Gujarat market may adversely affect our business prospects, financial conditions and results of operations.

19. Our Company requires significant amount of working capital for continues growth. Our inability to meet our working capital requirements may have an adverse effect on our results of operations.

Our business requires a substantial amount of working capital, primarily to increase the manufacturing capacity. Moreover, we may need working capital for the manufacturing and expansion of our business. Further, we are also required to meet the increasing demand and for achieving the same, adequate stocks have to be maintained which requires sufficient working capital. In the event, we are unable to source the required amount of working capital for addressing increased demand of our products, we might not be able to efficiently satisfy the demand of our customers. Even if we are able to source the required amount of funds, we cannot assure you that such funds would be sufficient to meet our cost estimates and that any increase in the expenses will not affect the price of our products. Further, if we decide to raise additional funds through the incurrence of debt, our interest and debt repayment obligations will increase, and could have a significant effect on our profitability and cash flows and we may be subject to additional covenants, which could limit our ability to access cash flows from operations. Any issuance of equity, on the other hand, could result in a dilution of your shareholding. Accordingly, continued increases in our working capital requirements may have an adverse effect on our financial condition and results of operations.

Our inability to obtain or maintain sufficient cash flow, credit facilities and other sources of funding, in a timely manner, or at all, to meet our working capital requirements or to pay our debts, could adversely affect our financial condition and results of operations.

20. Our business is dependent on developing and maintaining continuing relationships with our brokers/agents or customers. The loss of any significant broker or customer could have a material adverse effect on our business, financial condition and results of operations.

Our business is dependent on developing and maintaining a continuing relationship with our brokers and customers. In the event of a significant decline in the demand for our products by our customer, our business, results of operations and financial condition may be materially and adversely affected. There can be no assurance that we will be able to maintain the historic levels of business from these distributors and customers or that we will be able to replace these clients in case we lose any of them.

21. Our Company had negative cash flow in recent fiscals, details of which are given below. Sustained negative cash flow could adversely impact our business, financial condition and results of operations.

The detailed break up of cash flows is summarized in below mentioned table and our Company has reported negative cash flow in certain financial years:

	<i>₹ in lakhs</i>		
Particulars	31-03-2023	31-03-2022	31-03-2021
Net cash generated/(used) from operating activities	141.46	(261.26)	163.99
Net Cash generated/(used) from investing activities	(617.10)	(310.73)	(54.07)
Net Cash generated/(used) from financing activities	474.40	393.38	(147.34)
Net increase/(decrease) in cash and cash equivalents	(1.24)	(178.61)	(37.42)

There can be no assurance that our net cash flows shall be positive in the future. Any negative cash flows in the future over extended periods, or significant negative cash flows in the short term, could materially impact our ability to operate our business and implement our growth plans. As a result, our cash flows, business, future financial performance and results of operations could be materially and adversely affected. For further details, see **“Financial Statements as Restated”** beginning on page 159 of this Draft Prospectus.

22. We have issued Equity Shares in the last 12 (twelve) months at a price which is lower than the Issue Price.

During the last 12 (twelve) months, we have issued Equity Shares at a price that is lower than the Issue Price, as set forth below.

Date of Issue	No. of Equity Shares	Face Value (₹)	Issue Price (₹)	Nature of Allotment
10-05-2023	34,00,000	10.00	-	Bonus Issue

The price at which Equity Shares have been issued by our Company in the immediately preceding one year is not indicative of the Issue Price at which the Equity Shares shall be issued and traded (subsequent to listing). For further details regarding such allotments, see **“Capital Structure”** on page 56 of this Draft Prospectus.

23. The average cost of acquisition of Equity Shares by our Promoters is lower than the Issue Price.

For Details regarding average cost of acquisition of Equity Shares by our Promoters in our Company, please refer the table below:

Name of the Promoter	No. of Equity Shares Held	Avg. Cost of Acquisition (In ₹ per Equity Share)
Bharatkumar Papatlal Vachhani	9,45,000	0.44
Ajay Papatlal Vachhani	9,45,000	0.44

24. The success of our business strategy depends on our ability to enhance our own brands and product portfolio. If we fail to maintain and enhance our brand and reputation, consumers' recognition of our brands, and trust in us, our business may be materially and adversely affected.

Our brand and reputation are among our most important assets and we believe our brands serve in attracting consumers to our products in preference over those of our competitors. Enhancing our own brands, including various schemes, direct marketing is one of our most important business strategies. Consumers in existing or new markets may be unfamiliar with our brand and products and we may need to build or increase brand awareness in the relevant markets by increasing investments in advertising and promotional activities than we originally planned. We face, and will continue to face, competition with established brands in the new markets we intend to enter. Our success in marketing our products also depend on our ability to adapt to a rapidly changing market environment. If we do not successfully maintain, extend and expand our reputation and brand image, then our brands, product sales, financial condition, future cash flows and results of operations could be materially and adversely affected.

25. Shortage or non-availability of essential utilities such as electricity could affect our manufacturing operations and have an adverse effect on our business, results of operations and financial condition.

Our business operation is heavily dependent on continuous supply of electricity which is critical to our operations. While our power requirements are met through local state power grid and our solar power captive plant, we cannot assure you that these will be sufficient and, or, that we will not face a shortage of electricity despite these arrangements. Further, any shortage or non-availability of electricity could result in temporary shut-down of a part, or all, of our operations at the location experiencing such shortage. Such shut-downs could, particularly if they are for prolonged periods, have an adverse effect on our business, results of operations and financial condition.

26. Our Company's insurance policies may not protect us against certain operational risks or claims by our employees.

We maintain several insurance policies, including Commercial Package Policy, Product Liability Insurance Policy and Employee's Compensation Insurance Policy. While it is believed that the insurance coverage maintained by the company would reasonably be adequate to cover all normal risks associated with the operation of our business, there can be no assurance that any claim under the insurance policies maintained by the company will be honoured fully, in part or on time, nor that we have taken out sufficient insurance to cover all material losses. If we were to suffer loss or damage resulting from not obtaining or maintaining insurance or exceeding our insurance coverage, the loss would have to be borne by us and it could have a material adverse effect on our results of operations and financial condition.

27. Our Company's manufacturing activities are labour intensive and depend on availability of skilled and unskilled labourers in large numbers. In case of unavailability of such labourers and / or inability to retain such personnel, our business operations could be affected.

The manufacturing process requires labour. Thus, being labour intensive, we are dependent on labour force for carrying out manufacturing activities. Our Company has 124 employees as on August 31, 2023 out of which 102 are workers. Our operations and performance are labour intensive and depends on our ability to identify, attract and retain both skilled and unskilled labour. Shortage of skilled/ unskilled personnel or work stoppages caused by disagreements with labour could have an adverse effect on our business and results of operations. We have not experienced any disruptions in our business operations due to disputes or other problems with our work force in the past; however, there can be no assurance that we will not experience such disruptions in the future. Such disruptions may adversely affect our business and results of operations and may also divert the management's attention and result in increased costs.

28. *Our actual results could differ from the estimates and projections used to prepare our financial statements.*

The estimates and projections are based on and reflect our current expectations, assumptions and/ or projections as well as our perception of historical trends and current conditions, as well as other factors that we believe are appropriate and reasonable under the circumstances. There can be no assurance that our expectations, estimates, assumptions and/or projections, including with respect to the future earnings and performance will prove to be correct or that any of our expectations, estimates or projections will be achieved.

29. *We have entered into certain related party transactions and may continue to do so.*

We have entered into related party transactions with our Promoters, its group members/ entities, Directors etc. While we believe that all such transactions have been conducted on arm's length basis, however it is difficult to ascertain whether more favourable terms would have been achieved had such transactions been entered with unrelated parties. Furthermore, it is likely that we will continue to enter into related party transactions in the near future. There can be no assurance that such transactions, individually or in the aggregate, will not have an adverse effect on our financial condition and results of operation. For further details regarding the related party transactions, see the disclosure on related party transactions contained in the financial statements included in this Draft Prospectus and, also see the section "**Financial Statements as Restated - Related Party Transactions**" on page no. 198 of this Draft Prospectus.

30. *In addition to our existing indebtedness for our operations, we may be required to obtain further loan during the course of business. There can be no assurance that we would be able to service our existing and/or additional indebtedness.*

In addition to our existing indebtedness for our existing operations we may be required to raise further debt in the form of term loans and working capital loans in the course of business. Increased borrowings, if any, would adversely affect our debt-equity ratio and our ability to further borrow at competitive rates. Any failure to service our indebtedness or otherwise perform our obligations under our financing agreements could lead to a termination of one or more of our credit facilities, trigger cross default provisions, penalties and acceleration of amounts due under such facilities which may adversely affect our business, financial condition and results of operations. For further details of our indebtedness, please refer to the chapter titled "**Financial Indebtedness**" on page 202 of this Draft Prospectus.

31. *Our debt financing agreements contain certain restrictive covenants that may adversely affect our Company's business, credit ratings, prospects, results of operations and financial condition.*

Certain debt financing agreements that our Company has entered into contain restrictive covenants that limit our ability to undertake certain types of transactions. Under our debt financing agreements our Company is required to maintain certain financial covenants.

There can be no assurance that our Company has complied with all such restrictive covenants in a timely manner or at all or that we will be able to observe compliance with all such restrictive covenants in the future. A failure to observe the restrictive covenants under our debt financing agreements may result in termination of our financing agreements, levy of default interest, acceleration of all amounts due under such facilities and the enforcement of any security provided in relation thereto. Any acceleration of amounts due under such debt financing agreements may trigger cross-default or cross-acceleration provisions under other debt financing agreements, which may compel us to dedicate a substantial portion of our cash flow from operations or sell certain assets to make such payments thereby reducing the availability of cash for our working capital requirements and other general corporate purposes. Further, in the event of any of the circumstances coming into effect our business, prospects, results of operations and financial condition may be adversely affected.

32. *Our management will have broad discretion in how we apply the Net Proceeds of the Issue and there is no assurance that the Objects of the Offer will be achieved within the time frame expected, or at all, or that the deployment of Net Proceeds in the manner intended by us will result in an increase in the value of your investment.*

We intend to use the Net Proceeds for the purposes described under the "**Objects of the Issue**" on page 70 of the Draft Prospectus. The Objects of the Issue comprise (a) Funding Capital Expenditure towards Purchase of Additional Plant & Machinery, (b) funding incremental working capital requirements of our Company, (c) for issue related expenses, and (d) for general corporate purposes (the amount utilised for general corporate purposes shall not exceed 25% of the Gross Proceeds). Further, our Objects of the Issue have not been appraised by any bank, financial institution or other independent agency. Our management will have broad discretion to revise our business plans, estimates and budgets from time to time. Consequently, our funding requirements and deployment of funds may change, which may result in

the rescheduling of the proposed utilization of Net Proceeds and increasing or decreasing expenditure for a particular activity, subject to compliance with applicable law and the investment policies approved by our management. Further, pursuant to Section 27 of the Companies Act, 2013, any variation in the Objects of the Issue would require a special resolution of the shareholders, and the promoter or controlling shareholders will be required to provide an exit opportunity to the shareholders who do not agree to such proposal to vary the Objects of the Issue, in accordance with applicable law.

In case of an increase in actual expenses or shortfall in requisite funds, additional funds for a particular activity will be met by any means available to us, including internal accruals and additional equity and/or debt arrangements. If actual utilization towards the Objects of the Issue is lower than the proposed deployment, such balance will be used for future growth opportunities, including funding other existing objects, if required. If the estimated utilization of the Net Proceeds is not completely met in a fiscal year, it shall be carried forward.

33. *Our revenues are highly dependent on clients located in India. Any decline in the economic health of India could adversely affect our business, financial condition and results of operations.*

We majorly sell our products and services to clients located in India. If the economic conditions of India become volatile or uncertain or the conditions in the financial market were to deteriorate, especially in recent times due to the COVID-19 pandemic, or if there are any changes in laws applicable to our services and operations or if any restrictive conditions are imposed on us or our business, the pricing of our services may become less favourable for us. Further, our clients located in these geographies may reduce or postpone their spending significantly which would adversely affect our operations and financial conditions. Any reduction in spending on third party logistic services may lower the demand for our services and negatively affect our revenues and profitability.

34. *Our Directors and certain Key Management Personnel hold Equity Shares in our Company and are therefore interested in the Company's performance in addition to their remuneration and reimbursement of expenses.*

Certain of our Directors and Key Management Personnel are interested in our Company, in addition to regular remuneration or benefits and reimbursement of expenses, to the extent of their shareholding in our Company. There can be no assurance that our Key Management Personnel will exercise their rights as shareholders to the benefit and best interest of our Company. Our Promoters will continue to exercise significant control over us, including being able to control the composition of our Board of Directors and determine decisions requiring simple or special majority voting of shareholders, and our other shareholders may be unable to affect the outcome of such voting. Our Directors and our Key Management Personnel may take or block actions with respect to our business which may conflict with the best interests of the Company or that of minority shareholders. For details, see the section titled “*Capital Structure*” on Page 56 of this Draft Prospectus. There is no assurance that our Directors and/or our key management personnel will not provide competitive services or otherwise compete in business lines in which we are already present or will enter into in the future.

35. *We are dependent on a number of key personnel, including our senior management, and the loss of or our inability to attract or retain such persons could adversely affect our business, results of operations and financial condition.*

Our performance depends largely on the efforts and abilities of our senior management and other key personnel. We believe that the inputs and experience of our senior management and key managerial personnel are valuable for the development of business and operations and the strategic directions taken by our Company. We cannot assure you that we will be able to retain these employees or find adequate replacements in a timely manner, or at all. We may require a long period of time to hire and train replacement personnel when qualified personnel terminate their employment with our Company. We may also be required to increase our levels of employee compensation more rapidly than in the past to remain competitive in attracting employees that our business requires. The loss of the services of such persons may have an adverse effect on our business and our results of operations. The continued operations and growth of our business is dependent upon our ability to attract and retain personnel who have the necessary and required experience and expertise. Competition for qualified personnel with relevant industry expertise in India is intense. A loss of the services of our key personnel may adversely affect our business, results of operations and financial condition.

36. *Certain relevant copies of education qualification and experience certificates of our promoters/Directors are not traceable.*

Relevant copies of education qualification and experience certificates of some of our promoters/Directors are not traceable. We can't assure you that back-ups for the relevant copies of educational qualifications will be available in a timely manner or at all. We have relied on personal undertakings provided from them.

37. ***Some of the details mentioned in the respective KYC Documents of our promoters and Directors are not same as other KYC documents.***

Details of promoters and directors such as Name, Date of Birth, Address, etc. shall be incorporated in the Draft Prospectus. While going through the KYC documents such as Aadhaar Card, PAN, Passport, Driving License and Voting ID, it was found that certain details mismatch with each other. There is mismatch in Name and Address details in the KYCs of some Directors and promoters.

38. ***Non-availability of initial period secretarial/statutory records of the company filed with ROC since incorporation.***

Since the company was incorporated on April 21, 1998, some of the secretarial records are not traceable. However, we have taken the data from registers & minutes maintained by the Company from 1998 to 2005. We cannot assure you that the filings were made in a timely manner and that we shall not be subject to any penalty imposed by the regulatory authorities in this respect.

39. ***Our Company has availed certain unsecured loan which can be recalled at any time.***

Our Company has availed certain unsecured loan amounting to ₹ 600.98 lakh as on August 31, 2023. The unsecured loan taken by our Company from Promoter and Promoter Group may be recalled at any time. Though our Company intends to repay the loan amount in near future, sudden recall may disrupt our operations and also may force us to find alternative sources of financing, which may not be available on commercial reasonable terms or at all. opt for funding at higher interest rates, resulting in higher financial burden. We may not have adequate working capital to meet business requirements of our Company, and, as a result, any such demand by the lenders may affect our business, cash flows, financial condition and results of operations. Further, in respect of such unsecured loan, no proper agreement has been executed between the parties. For further details, please refer to the section “***Financial Indebtedness***” beginning on page no. 202 of this Draft Prospectus.

40. ***The deployment of funds raised through this Issue shall not be subject to any Monitoring Agency and shall be purely dependent on the discretion of the management of our Company.***

Since the Issue size is less than Rs. 10,000.00 Lakh there is no mandatory requirement of appointing an independent monitoring agency for overseeing the deployment of utilization of funds raised through this Issue. The deployment of these funds raised through this Issue, is hence, at the discretion of the management and the Board of Directors of our Company and will not be subject to monitoring by any independent agency. Any inability on our part to effectively utilize the Issue proceeds could adversely affect our financials.

41. ***We could be harmed by employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.***

We own a large number of plant and machinery used in our operations. To maintain our capability to undertake jobs, we may have to purchase plant and machinery built with the latest technologies and knowhow. We cannot assure you that we will be immune from the associated operational risks such as the obsolescence of our plant and machinery, destruction, theft or major equipment breakdowns or failures to repair our major plant and machinery, which may result in their unavailability, order delays, cost overruns etc.

The latest technologies used in newer models of equipment may improve productivity significantly and render our older equipment obsolete. Obsolescence, destruction, theft or breakdowns of our major plants or equipment may significantly increase our equipment purchase cost and the depreciation of our plants and equipment, as well as change the way our management estimates the useful life of our plants and equipment. We may have to incur high cost when our plants or equipment are not readily available from the market or requires services from original equipment manufacturers. We may experience significant price increases due to supply shortages, inflation, transportation difficulties or unavailability of bulk discounts. Such replacement, repair or maintenance failures or price increases may not be adequately covered by the insurance policies availed by our Company and may have an adverse effect on our business, cash flows, financial condition and results of operations.

In the event that such regulations become more stringent, such as increasing the requirements for obtaining approvals or meeting government standards, this could result in changes to the infrastructure necessary for manufacturing activities, increasing the costs related to changing manufacturing methods in order to meet government standards and increasing penalties for non-compliance. Furthermore, we may incur significant expenditure relating to operating methodologies and standards in order to comply with applicable environmental laws and regulations. Failure to comply with these laws, rules, and regulations, many of which may be applied retroactively, may include administrative, civil and criminal penalties, revocation of permits and corrective orders. For further information on the regulatory authorities and applicable rules, and regulations, see the section titled ***“Key Industry Regulations and Policies”*** beginning on Page 114 of this Draft Prospectus.

As a result, they will have the ability to significantly influence matters requiring shareholders approval, including the ability to appoint Directors to our Board and the right to approve significant actions at Board and at shareholders’ meetings, including the issue of Equity Shares and dividend payments, business plans, mergers and acquisitions, any consolidation or joint venture arrangements, any amendment to our Memorandum of Association and Articles of Association, and any assignment or transfer of our interest in any of our licenses. 56. *We are subject to risks arising from interest rate fluctuations, which could adversely affect our business, financial condition and results of operations.*

Interest rates for borrowings have been volatile in India in recent periods. Our operations are funded to a significant extent by working capital debt facilities and increases in interest rate (and consequent increase in the cost of servicing such debt) may have an adverse effect on our results of operations and financial condition. Our current debt facilities carry interest at variable rates as well as fixed rates. Although we may in the future engage in interest rate hedging transactions from time to time, there can be no assurance that these agreements will protect us adequately against interest rate risks.

57. *The future operating results are difficult to predict and may fluctuate or adversely vary from the past performance.*

The company’s operating results may fluctuate or adversely vary from past performances in the future due to a number of factors, many of which are beyond the company’s control. To keep our factory operated at optimum capacity, we have to vigorously increased our marketing efforts and also expand our operation. If we are not able to concentrate fully on marketing and increased our sales, our production capacity will be at underutilized level, which will adversely affect our turnover, revenue and profitability.

- 61. *Our Capacity utilisation was lower in past years.***

Since our company is into manufacturing business, the capacity utilisation is an important factor to determine the strength and potential output that can be produced if capacity was fully used.

We have seen the downward in our actual production in past years as compared to installed capacity of plant and machinery for production. The capacity utilization was lower in past years i.e. 87.85% for Maize Oil and 90.83% for Maize Cake in the financial year 2022-23 and 93.01% for Maize Oil and 94.56% for Maize Cake in the financial year 2021-22. B. Issue Related Risks

65. ***In the event there is any delay in the completion of the Issue, there would be a corresponding delay in the completion of the objects of this Issue which would in turn affect our revenues and results of operations.***

The funds that we receive would be utilized for the Objects of the Issue as has been stated in the Chapter “*Objects of the Issue*” on page 70 of this Draft Prospectus. The proposed schedule of implementation of the objects of the Issue is based on our management’s estimates. If the schedule of implementation is delayed for any other reason whatsoever, including any delay in the completion of the Issue, we may have to revise our business, development and working capital plans resulting in unprecedented financial mismatch and this may adversely affect our revenues and results of operations.

66. ***There is no guarantee that our Equity Shares will be listed on the SME Platform of BSE Limited in a timely manner or at all.***

In accordance with Indian law and practice, permission for listing and trading of our Equity Shares will not be granted until after certain actions have been completed in relation to this Issue and until Allotment of Equity Shares pursuant to this Issue. In accordance with current regulations and circulars issued of SEBI, our Equity Shares are required to be listed on the SME Platform of BSE Limited within prescribed time lines. However, we cannot assure you that the trading in our Equity Shares will commence in a timely manner or at all. Any failure or delay in obtaining final listing and trading approvals may restrict our ability to dispose of your Equity Shares.

67. ***The Issue Price of our Equity Shares may not be indicative of the market price of our Equity Shares after the Issue.***

The Issue price is based on numerous factors and may not be indicative of the market price for our Equity Shares after the Issue. The market price of our Equity Shares could be subject to significant fluctuations after the Issue, and may decline below the Issue Price. There can be no assurance that you will be able to resell your Shares at or above the Issue Price. Among the factors that could affect our Share price are: variations in the rate of growth of our financial indicators, such as earnings per share, net profit and income; changes in income or earnings estimates or publication of research reports by analysts; speculation in the press or investment community; general market conditions; and domestic and international economic, legal and regulatory factors unrelated to our performance.

68. *After this Issue, the price of our Equity Shares may be volatile, or an active trading market for our Equity Shares may not be sustained.*

Prior to this Issue, there has been no public market for our Equity Shares, and an active trading market may not develop or be sustained upon the completion of this Issue. The initial public offering price of the Equity Shares offered hereby was determined through our negotiations with the LM and may not be indicative of the market price of the Equity Shares after this Issue. The market price of our Equity Shares after this Issue will be subject to significant fluctuations in response to, among other factors:

- variations in our operating results and the performance of our business;
- regulatory developments in our target markets affecting us, our customers, or our competitors;
- changes in financial estimates by securities research analysts;
- addition or loss of executive officers or key employees;
- loss of one or more significant customers;
- the performance of the Indian and global economy;
- significant developments in India's economic liberalization and deregulation policies, and the fiscal regime;
- volatility in the Indian and global securities markets;
- performance of our competitors and perception in the Indian market about investment in our industry; and
- adverse media reports, if any, on our Company, or the industry.

Many of these factors are beyond our control. There has been recent volatility in the Indian stock markets and our share price could fluctuate significantly as a result of such volatility in the future. There can be no assurance that an active trading market for our Equity Shares will develop or be sustained after this Issue, or that the price at which our Equity Shares are initially offered will correspond to the prices at which they will trade in the market subsequent to this Issue.

69. *The investors will not be able to sell immediately on an Indian stock exchange any of the Equity Shares they purchase in the Issue.*

We have applied to BSE Limited to use its name as the Stock Exchange in this offer document for listing our shares on the SME Platform of BSE Limited. In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Offer will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorizing the issuing of Equity Shares to be submitted. There could be a delay in listing the Equity Shares on the SME Platform of BSE Limited. Any delay in obtaining the approval would restrict your ability to dispose of your Equity Shares.

70. *There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.*

Once listed, we would be subject to circuit breakers imposed by stock exchange, which does not allow transactions beyond specified increases or decreases in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on circuit breakers is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. This circuit breaker limits the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, no assurance may be given regarding your ability to sell your Equity Shares or the price at which you may be able to sell your Equity Shares at any particular time.

71. *Any future issuance of Equity Shares may dilute the investors' shareholdings or sales of our Equity Shares by our Promoters or Promoter Group may adversely affect the trading price of our Equity Shares.*

Any future equity issuances by us or sales of our Equity Shares by our Promoters or Promoter Group may adversely affect the trading price of our Equity Shares and our Company's ability to raise capital through an issue of securities. In addition, any perception by potential investors that such issuances or sales might occur could also affect the trading price of our Equity Shares. Additionally, the disposal, pledge or encumbrance of our Equity Shares by any of our Company's major shareholders, or the perception that such transactions may occur may affect the trading price of our Equity Shares. No assurance may be given that our Company will not issue Equity Shares or that such shareholders will not dispose of, pledge or encumber their Equity Shares in the future.

72. *The requirements of being a public listed company may strain our resources and impose additional requirements.*

We have no experience as a public listed company or with the increased scrutiny of its affairs by shareholders, regulators and the public at large that is associated with being a public listed company. As a public listed company, we will incur significant legal, accounting, corporate governance, and other expenses that we did not incur as a unlisted company. We will also be subject to the provisions of the listing agreements signed with the Stock Exchange which require us to file unaudited financial results on a half-yearly basis. In order to meet our financial control and disclosure obligations, significant resources and management supervision will be required. As a result, our management's attention may be diverted from other business concerns, which could have an adverse effect on our business and operations. There can be no assurance that we will be able to satisfy our reporting obligations and/or readily determine and report any changes to our results of operations in a timely manner as other listed companies. In addition, we will need to increase the strength of our management team and hire additional legal and accounting staff with appropriate public company experience and accounting knowledge and we cannot assure that we will be able to do so in a timely manner.

73. *Our Company has not paid any dividends till now and there can be no assurance that we will pay dividends in future.*

Our ability to pay dividends in the future will depend upon a variety of factors such as future earnings, financial condition, cash flows, working capital requirements, and restrictive covenants in our financing arrangements. Our Company has not paid any dividends till now and there can be no assurance that we will pay dividends in future. Our ability to pay dividends in the future will depend on our earnings, financial condition and capital requirements. Dividends distributed by us will attract dividend distribution tax at rates applicable from time to time. There can be no assurance that we will generate sufficient income to cover our operating expenses and pay dividends to our shareholders, or at all. Our ability to pay dividends could also be restricted under the existing or certain financing arrangements that we may enter into.

74. *Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.*

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see "**Dividend Policy**" on page 158 of this draft prospectus.

75. *You may be subject to Indian taxes arising out of capital gains on sale of Equity Shares.*

Under the current Indian Income Tax provisions, all transactions of purchase and sales of securities on Indian stock exchanges are subject to levy of securities transaction tax (STT) which will be collected by respective stock exchange on which the securities are transacted. Accordingly, the Indian Income Tax Act has special capital gains tax provisions for all transactions of purchase and sale of equity shares carried out on the Indian Stock Exchanges. Under the current Indian Income Tax provisions, unless specifically exempted, capital gains arising from the sale of equity shares in an Indian company are generally taxable in India.

76. *Foreign investors may be restricted in their ability to purchase or sell Equity Shares.*

Under foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing and reporting requirements specified by the RBI or in the alternate, the pricing is in compliance with the extant provisions of SEBI ICDR Regulations. If the transfer of shares is not in compliance with such pricing or reporting requirements and does not fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection or a tax clearance certificate from the income tax authority. We cannot assure that any required approval from the RBI or any other government agency can be obtained on any particular terms or at all.

77. Applicants to this Issue are not allowed to withdraw their Applications after the Issue Closing Date.

In terms of the SEBI (ICDR) Regulations, Applicants in this Issue are not allowed to withdraw their Applications after the Issue Closing Date. The Allotment in this Issue and the credit of such Equity Shares to the Applicant's demat account with its depository participant shall be completed within such period as prescribed under the applicable laws. There is no assurance, however, that material adverse changes in the international or national monetary, financial, political or economic conditions or other events in the nature of force majeure, material adverse changes in our business, results of operation or financial condition, or other events affecting the Applicant's decision to invest in the Equity Shares, would not arise between the Issue Closing Date and the date of Allotment in this Issue. Occurrence of any such events after the Issue Closing Date could also impact the market price of our Equity Shares. The Applicants shall not have the right to withdraw their applications in the event of any such occurrence. We cannot assure you that the market price of the Equity Shares will not decline below the Issue Price. To the extent the market price for the Equity Shares declines below the Issue Price after the Issue Closing Date, the shareholder will be required to purchase Equity Shares at a price that will be higher than the actual market price of the Equity Shares at that time. Should that occur, the shareholder will suffer an immediate unrealized loss as a result. We may complete the Allotment even if such events may limit the Applicants' ability to sell our Equity Shares after this Issue or cause the trading price of our Equity Shares to decline.

78. The investors may be restricted in their ability to exercise pre-emptive rights under Indian law and may be adversely affected by future dilution of their ownership position.

Under the Companies Act, 2013, a Company incorporated in India must offer its holders of shares pre-emptive rights to subscribe and pay for a proportionate number of shares to maintain their existing ownership percentages before the issuance of any new shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the shares which are voted on the resolution. However, if the law of the jurisdiction the investors are in does not permit them to exercise their pre-emptive rights without us filing an offering document or registration statement with the applicable authority in the jurisdiction they are in, they will not be able to exercise their pre-emptive rights unless we make such a filing. If we elect not to make such a filing, the new securities may be issued to a custodian, who may sell the securities for the investors' benefit. The value such custodian would receive upon the sale of such securities if any, and the related transaction costs cannot be predicted. To the extent that the investors' are unable to exercise pre-emptive rights granted in respect of the Equity Shares, their proportional interest in us would be reduced.

79. Rights of shareholders under Indian law may be more limited than under the laws of other jurisdictions.

The Companies Act and related regulations, the Articles of Association, and the Listing Agreements to be entered into with the Stock Exchange govern the corporate affairs of the Company. The Legal principles relating to these matters and the validity of corporate procedures, directors' fiduciary duties and liabilities, and shareholders' rights may differ from those that would apply to a company in another jurisdiction. Shareholders' rights under Indian law may not be as extensive as shareholders' rights under the laws of other countries or jurisdictions. Investors may have more difficulty in asserting their rights as a shareholder than as a shareholder of a corporation in another jurisdiction.

80. Our Equity Shares are quoted in Indian Rupees in India, and therefore investors may be subject to potential losses arising out of exchange rate risk on the Indian Rupee and risks associated with the conversion of Indian Rupee proceeds into foreign currency.

Investors are subject to currency fluctuation risk and convertibility risk since the Equity Shares are quoted in Indian Rupees on the Indian stock exchanges on which they are listed. Dividends on the Equity Shares will also be paid in Indian Rupees. The volatility of the Indian Rupee against the U.S. dollar and other currencies subjects investors who convert funds into Indian Rupees to purchase our Equity Shares to currency fluctuation risks.

EXTERNAL RISK FACTORS

81. *The COVID-19 pandemic, or any future pandemic or widespread public health emergency, could materially and adversely impact our business, financial condition, cash flows and results of operations.*

In late 2019, COVID-19 emerged and by March 11, 2020 was declared a global pandemic by The World Health Organization. Governments and municipalities around the world instituted measures in an effort to control the spread of COVID-19, including quarantines, shelter-in-place orders, school closings, travel restrictions, lock down of cities and closure of non-essential businesses. By the end of March, the macroeconomic impacts became significant, exhibited by, among other things, a rise in unemployment and market volatility. The outbreak of COVID-19 in many countries, including India, the United Kingdom and the United States, has significantly and adversely impacted economic activity and has contributed to significant volatility and negative pressure in financial markets, and it is possible that the outbreak of COVID-19 will cause a prolonged global economic crisis, recession or depression, despite monetary and fiscal interventions by governments and central banks globally. On March 24, 2020, the Government of India ordered a national lockdown in response to the spread of COVID-19. Although some governments are beginning to ease or lift these restrictions, the impacts from the severe disruptions caused by the effective shutdown of large segments of the global economy remain unknown and no prediction can be made of when any of the restrictions currently in place will be relaxed or expire, or whether or when further restrictions will be announced.

The outbreak, or threatened outbreak, of any severe communicable disease (particularly COVID-19) could materially adversely affect overall business sentiment and environment, particularly if such outbreak is inadequately controlled. The spread of any severe communicable disease may also adversely affect the operations of our clients and service providers, which could adversely affect our business, financial condition and results of operations. The outbreak of COVID-19 has resulted in authorities implementing several measures such as travel bans and restrictions, quarantines, shelter in place orders, and shutdowns. These measures have impacted and may further impact our workforce and operations, the operations of our clients, and those of our respective service providers. There is currently substantial medical uncertainty regarding COVID-19. A rapid increase in severe cases and deaths where measures taken by governments fail or are lifted prematurely, may cause significant economic disruption in India and in the rest of the world. The scope, duration and frequency of such measures and the adverse effects of COVID-19 remain uncertain and could be severe. If any of our employees were suspected of contracting COVID-19 or any other epidemic disease, this could require us to quarantine some or all of these employees or disinfect the facilities used for our operations. In addition, our revenue and profitability could be impacted to the extent that a natural disaster, health epidemic or other outbreak harms the Indian and global economy in general.

The outbreak has significantly increased economic uncertainty. It is likely that the current outbreak or continued spread of COVID-19 will cause an economic slowdown and it is possible that it could cause a global recession. The spread of COVID-19 has caused us to modify our business practices (including employee travel, employee work locations, and cancellation of physical participation in meetings, events and conferences), and we may take further actions as may be required by government authorities or that we determine are in the best interests of our employees, customers, partners, and suppliers. There is no certainty that such measures will be sufficient to mitigate the risks posed by the outbreak, and our ability to perform critical functions could be harmed. The extent to which the COVID-19 further impacts our results will depend on future developments, which are highly uncertain and cannot be predicted, including new information which may emerge concerning the severity of the coronavirus and the actions taken globally to contain the coronavirus or treat its impact, among others. Existing insurance coverage may not provide protection for all costs that may arise from all such possible events. The degree to which COVID-19 impacts our results will depend on future developments, which are highly uncertain and cannot be predicted, including, but not limited to, the duration and spread of the outbreak, its severity, the actions taken to contain the outbreak or treat its impact, and how quickly and to what extent normal economic and operating conditions can resume. The above risks can threaten the safe operation of our facilities and cause disruption of operational activities, environmental harm, loss of life, injuries and impact the wellbeing of our people.

Further in case the lockdown is extended, it could result in muted economic growth or give rise to a recessionary economic scenario, in India and globally, which could adversely affect the business, prospects, results of operations and financial condition of our Company. The full extent to which the COVID-19 pandemic, or any future pandemic or widespread public health emergency impacts our business, operations and financial results will depend on numerous evolving factors that we may not be able to accurately predict, including: the scope, severity, and duration of the pandemic; actions taken by governments, business and individuals in response to the pandemic; the effect on customer demand for and ability to pay for our products; the impact on our capital expenditure; disruptions or restrictions on our employees' and suppliers' ability to work and travel; any extended period of remote work arrangements; and strain on our or our customers' business continuity plans, and resultant operational risk.

82. A slowdown in economic growth in India could adversely affect our business, results of operations, financial condition and cash flows.

We are dependent on domestic, regional and global economic and market conditions. Our performance, growth and market price of our Equity Shares are and will be dependent to a large extent on the health of the economy in which we operate. There have been periods of slowdown in the economic growth of India. Demand for our products may be adversely affected by an economic downturn in domestic, regional and global economies. Economic growth in the country in which we operate is affected by various factors including domestic consumption and savings, balance of trade movements, namely export demand and movements in key imports of materials, global economic uncertainty and liquidity crisis, volatility in exchange currency rates, and annual rainfall which affects agricultural production. Consequently, any future slowdown in the Indian economy could harm our business, results of operations, financial condition and cash flows. Also, a change in the government or a change in the economic and deregulation policies could adversely affect economic conditions prevalent in the areas in which we operate in general and our business in particular and high rates of inflation in India could increase our costs without proportionately increasing our revenues, and as such decrease our operating margin.

83. Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws, may adversely affect our business and financial performance.

Our business and financial performance could be adversely affected by unfavourable changes in or interpretations of existing, or the promulgation of new laws, rules and regulations applicable to us and our business. Please refer to **“Key Industry Regulations and Policies”** on page **Error! Bookmark not defined.** of this Draft Prospectus for details of the laws currently applicable to us.

There can be no assurance that the Government of India may not implement new regulations and policies which will require us to obtain approvals and licenses from the Government of India and other regulatory bodies or impose onerous requirements and conditions on our operations. Our Company will comply with relevant regulations as and when applicable. However, any such changes and the related uncertainties with respect to the applicability, interpretation and implementation of any amendment to, or change to governing laws, regulation or policy in the jurisdictions in which we operate may have a material adverse effect on our business, financial condition and results of operations. In addition, we may have to incur expenditures to comply with the requirements of any new regulations, which may also materially harm our results of operations. Any unfavourable changes to the laws and regulations applicable to us could also subject us to additional liabilities.

GST has been implemented with effect from July 1, 2017 and has replaced the indirect taxes on goods and services such as central excise duty, service tax, central sales tax, state VAT and surcharge being collected by the central and state governments. The GST has led to increase tax incidence and administrative compliance. Any future amendments may affect our overall tax efficiency, and may result in significant additional taxes becoming payable.

Further, the general anti avoidance rules (“GAAR”) provisions have been made effective from assessment year 2018-19 onwards, i.e.; financial Year 2017-18 onwards and the same may get triggered once transactions are undertaken to avoid tax. The consequences of the GAAR provisions being applied to an arrangement could result in denial of tax benefit amongst other consequences. In the absence of any precedents on the subject, the application of these provisions is uncertain.

The application of various Indian tax laws, rules and regulations to our business, currently or in the future, is subject to interpretation by the applicable taxation authorities. If such tax laws, rules and regulations are amended, new adverse laws, rules or regulations are adopted or current laws are interpreted adversely to our interests, the results could increase our tax payments (prospectively or retrospectively) and/or subject us to penalties. Further, changes in capital gains tax or tax on capital market transactions or sale of shares could affect investor returns. As a result, any such changes or interpretations could have an adverse effect on our business and financial performance.

84. Any downgrading of India's debt rating by an independent agency may harm our ability to raise financing.

Any adverse revisions to India's credit ratings for domestic and international debt by domestic or international rating agencies may adversely affect our ability to raise additional financing and the interest rates and other commercial terms at which such additional financing is available. This could have an adverse effect on our capital expenditure plans, business and financial performance and the price of our Equity Shares.

85. *Inflation in India could have an adverse effect on our profitability and if significant, on our financial condition.*

Inflation is typically impacted by factors such as governmental policies, regulations, commodity prices, liquidity and global economic environment. Any change in the government or a change in the economic and deregulation policies could adversely affect the inflation rates. Continued high rates of inflation may increase our costs such as salaries, travel costs and related allowances, which are typically linked to general price levels. There can be no assurance that we will be able to pass on any additional costs to our clients or that our revenue will increase proportionately corresponding to such inflation. Accordingly, high rates of inflation in India could have an adverse effect on our profitability and, if significant, on our financial condition.

86. *We have not prepared, and currently do not intend to prepare, our financial statements in accordance with the International Financial Reporting Standards (“IFRS”). Our transition to IFRS reporting could have a material adverse effect on our reported results of operations or financial condition.*

Public companies in India, including us, may be required to prepare annual and interim financial statements under IFRS in accordance with the roadmap for convergence with IFRS announced by the Ministry of Corporate Affairs, Government of India through a press note dated January 22, 2010 (the “IFRS Convergence Note”). The Ministry of Corporate Affairs by a press release dated February 25, 2011 has notified that 35 Indian Accounting Standards are to be converged with IFRS. The date of implementation of such converged Indian accounting standards has not yet been determined. Our financial condition, results of operations, cash flows or changes in shareholders’ equity may appear materially different under IFRS than under Indian GAAP or our adoption of converged Indian Accounting Standards may adversely affect our reported results of operations or financial condition. This may have a material adverse effect on the amount of income recognized during that period and in the corresponding (restated) period in the comparative Fiscal/period.

87. *Financial difficulty and other problems in certain long-term lending institutions and investment institutions in India could have a negative impact on our business.*

We are exposed to the risks of the Indian financial system which may be affected by the financial difficulties faced by certain Indian financial institutions because the commercial soundness of many financial institutions may be closely related as a result of credit, trading, clearing or other relationships. This risk, which is referred to as “systemic risk,” may adversely affect financial intermediaries, such as clearing agencies, banks, securities firms and exchanges with whom we interact on a daily basis. Our transactions with these financial institutions expose us to credit risk in the event of default by the counter party, which can be exacerbated during periods of market illiquidity. As the Indian financial system operates within an emerging market, we face risks of a nature and extent not typically faced in more developed economies, including the risk of deposit runs notwithstanding the existence of a national deposit insurance scheme. The problems faced by individual Indian financial institutions and any instability in or difficulties faced by the Indian financial system generally could create adverse market perception about Indian financial institutions and banks. This in turn could adversely affect our business, financial condition, results of operations and cash flows.

88. *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.*

Under the foreign exchange regulations currently in force in India, transfers of shares between non-residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/tax clearance certificate from the income tax authority. There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

89. *Political instability or changes in the Government could adversely affect economic conditions in India generally and our business in particular.*

Our business, and the market price and liquidity of our Equity Shares, may be affected by interest rates, changes in Government policy, taxation, social and civil unrest and other political, economic or other developments in or affecting India. Elimination or substantial change of policies or the introduction of policies that negatively affect the Company’s business could cause its results of operations to suffer. Any significant change in India’s economic policies could disrupt business and economic conditions in India generally and the Company’s business in particular.

90. *Terrorist attacks, civil unrests and other acts of violence or war involving India or other countries could adversely affect the financial markets, our business, financial condition and the price of our Equity Shares.*

Any major hostilities involving India or other acts of violence, including civil unrest or similar events that are beyond our control, could have a material adverse effect on India's economy and our business. Incidents such as the Mumbai terrorist attacks and other acts of violence may adversely affect the Indian stock markets where our Equity Shares will trade as well the global equity markets generally. Such acts could negatively impact business sentiment as well as trade between countries, which could adversely affect our Company's business and profitability. Additionally, such events could have a material adverse effect on the market for securities of Indian companies, including the Equity Shares.

INDIAN ECONOMY

INTRODUCTION

Strong economic growth in the first quarter of FY 2022-23 helped India overcome the UK to become the fifth-largest economy after it recovered from repeated waves of COVID-19 pandemic shock. Real GDP in the first quarter of 2022–23 is currently about 4% higher than its corresponding 2019-20, indicating a strong start for India's recovery from the pandemic. Given the release of pent-up demand and the widespread vaccination coverage, the contact-intensive services sector will probably be the main driver of development in 2022–2023. Rising employment and substantially increasing private consumption, supported by rising consumer sentiment, will support GDP growth in the coming months.

Future capital spending of the government in the economy is expected to be supported by factors such as tax buoyancy, the streamlined tax system with low rates, a thorough assessment and rationalisation of the tariff structure, and the digitization of tax filing. In the medium run, increased capital spending on infrastructure and asset-building projects is set to increase growth multipliers, and with the revival in monsoon and the Kharif sowing, agriculture is also picking up momentum. The contact-based services sector has largely demonstrated promise to boost growth by unleashing the pent-up demand over the period of April-September 2022. The sector's success is being captured by a number of HFIs (High-Frequency Indicators) that are performing well, indicating the beginnings of a comeback.

India has emerged as the fastest-growing major economy in the world and is expected to be one of the top three economic powers in the world over the next 10-15 years, backed by its robust democracy and strong partnerships.

MARKET SIZE

India's nominal GDP at current prices was estimated at Rs. 232.15 trillion (US\$ 3.12 trillion) in FY22. With more than 100 unicorns valued at US\$ 332.7 billion, India has the third-largest unicorn base in the world. The government is also focusing on renewable sources to generate energy, and is planning to achieve 40% of its energy from non-fossil sources by 2030.

According to the McKinsey Global Institute, India needs to boost its rate of employment growth and create 90 million non-farm jobs between 2023 and 2030 in order to increase productivity and economic growth. The net employment rate needs to grow by 1.5% per annum from 2023 to 2030 to achieve 8-8.5% GDP growth between this period. India's current account deficit (CAD), primarily driven by an increase in the trade deficit, stood at 1.2% of GDP in 2021-22.

Exports fared remarkably well during the pandemic and aided recovery when all other growth engines lost steam in terms of their contribution to GDP. Going forward, the contribution of merchandise exports may waver as several of India's trade partners witness an economic slowdown. According to Mr. Piyush Goyal, Minister of Commerce and Industry, Consumer Affairs, Food and Public Distribution and Textiles, Indian exports are expected to reach US\$ 1 trillion by 2030.

RECENT DEVELOPMENTS

India is primarily a domestic demand-driven economy, with consumption and investments contributing 70% to the country's economic activity. With the economic scenario improving on recovering from the COVID-19 pandemic shock, several investments and developments have been made across various sectors of the economy. According to World Bank, India must continue to prioritise lowering inequality while also launching growth-oriented policies to boost the economy. In view of this, the country witnessed many developments in the recent past, some of which are mentioned below.

GOVERNMENT INITIATIVES

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The Indian government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Over recent decades, India's rapid economic growth has led to a substantial increase in its demand for exports. Besides this, a number of the government's flagship programmes, including Make in India, Start-up India, Digital India, the Smart City Mission, and the Atal Mission for Rejuvenation and Urban Transformation, are aimed at creating immense opportunities in India. ROAD AHEAD

In the second quarter of FY 2022-23, the growth momentum of the first quarter was sustained, and high-frequency indicators (HFIs) performed well in July and August of 2022. India's comparatively strong position in the external sector reflects the country's generally positive outlook for economic growth and rising employment rates. India ranked fifth in foreign direct investment inflows among the developed and developing nations listed for the first quarter of 2022.

India's economic story during the first half of the current financial year highlighted the unwavering support the government gave to its capital expenditure, which, in FY 2022–23 (until August 2022), stood 46.8% higher than the same period last year. The ratio of revenue expenditure to capital outlay decreased from 6.4 in the previous year to 4.5 in the current year, signaling a clear change in favour of higher-quality spending. Stronger revenue generation as a result of improved tax compliance, increased profitability of the company, and increasing economic activity also contributed to rising capital spending levels.

Despite the continued global slowdown, India's exports climbed at the second highest rate this quarter. With a reduction in port congestion, supply networks are being restored. The CPI-C and WPI inflation reduction from April 2022 already reflects the impact. In August 2022, CPI-C inflation was 7.0%, down from 7.8% in April 2022. Similarly, WPI inflation has decreased from 15.4% in April 2022 to 12.4% in August 2022. With a proactive set of administrative actions by the government, flexible monetary policy, and a softening of global commodity prices and supply-chain bottlenecks, inflationary pressures in India look to be on the decline overall.

EDIBLE OIL INDUSTRY REPORT

Importance of Edible Oils in the Country's Economy

Oilseeds and edible oils are two of the most sensitive essential commodities. India is one of the largest producer of oilseeds in the world and this sector occupies an important position in the agricultural economy, accounting for the estimated production of 36.56 million tons of nine cultivated oilseeds during the year 2020-21(November-October) as per 3rd Advance Estimates released by the Ministry of Agriculture on 25.05.2021.

Types of Oils commonly in use in India

India is fortunate in having a wide range of oilseeds crops grown in its different agro climatic zones. Groundnut, mustard, rapeseed, sesame, safflower, linseed, nigerseed, castor are the major traditionally cultivated oilseeds. Soyabean and sunflower have also assumed importance in recent years. Coconut is most important amongst the plantation crops. Efforts are being made to grow oil palm in Andhra Pradesh, Karnataka, Tamil Nadu and North- Eastern parts of the country in addition to Kerala and Andaman & Nicobar Islands. Among the non-conventional oils, rice bran oil and cottonseed oil are the most important. In addition, oilseeds of tree and forest origin, which grow mostly in tribal inhabited areas, are also a significant source of oils. Consumption Pattern of Edible Oils in India

India is a vast country and inhabitants of several of its regions have developed specific preference for certain oils largely depending upon the oils available in the region. For example, people in the South and West prefer groundnut oil while those in the East and North use mustard, rapeseed oil. Likewise several pockets in the South have a preference for coconut and sesame oil. Inhabitants of northern plain are basically consumers of fats and therefore prefer Vanaspati, a term used to denote a partially hydrogenated edible oil mixture of oils like soyabean, sunflower, rice bran and cottonseed oils. Many new oils from oilseeds of tree and forest origin have found their way to the edible pool largely through vanaspati route. Of late, things have changed. Through modern technological means such as physical refining, bleaching and de-odorization, all oils have been rendered practically colorless, odorless and tasteless and therefore, have become easily interchangeable in the kitchen. Oils such as soyabean oil, cottonseed oil, sunflower oil, rice bran oil, palm oil and its liquid fraction- palmolein which were earlier not known have now entered the kitchen. The share of raw oil, refined oil and vanaspati in the total edible oil market is estimated roughly at 35%, 60% and 5% respectively. About 56 % of domestic demand of edible oils is met through imports out of which palm oil/palmolein constitutes about 54%. The consumption of refined palmolein (RBD palmolein) as well as its blending with other oils has increased substantially over the years and is used extensively in hotels, restaurants and in preparation of wide varieties of food products.

Major Features of Edible Oil Economy

There are two major features, which have significantly contributed to the development of this sector. One was the setting up of the Technology Mission on Oilseeds in 1986 which has been converted into a National Mission on Oilseeds and Oil Palm (NMOOP) in 2014. As per a decision regarding merger/ conversions or linkage of Schemes/ sub-Schemes/ programmes, etc. having similar components such as incentive for seed, demonstration, and farm implements including efficient water application tools covered under NFSM and Oil seeds was merged under revamped NFSM from the year 2018-19.

This gave a thrust to Government's efforts for augmenting the production of oilseeds. This is evident by the very impressive increase in the production of oilseeds from about 11.3 million tons in 1986-87 to 33.22 million tons in 2019-20. Most of the oilseeds are cultivated on marginal land and are dependent on rainfall and other climatic conditions. The other dominant feature which has had significant impact on the present status of edible oilseeds/oil industry has been the program of liberalization under which the Government's economic policy allowing greater freedom to the open market and encourages healthy competition and self regulation rather than protection and control. Controls and regulations have been relaxed resulting in a highly competitive market dominated by both domestic and multinational players

Export Import Policy on Edible Oils

The country has to rely on imports to meet the gap between demand and supply. Import of edible oils is under Open General License (OGL). In order to harmonize the interests of farmers, processors and consumers, Government reviews the duty structure of edible oils from time to time. With effect from 14.06.2018, the import duty on all crude and refined edible oils, except Palm oil and Olive oil was raised to 35% and 45% respectively while the import duty on Olive oil was increased to 40%. With effect from 01.01.2020, the import duty on Crude and Refined Palm Oil was revised to 37.5% and 45% respectively. With effect from 08.01.2020, import policy of Refined Palm Oil is amended from 'free' to 'Restricted' category. With effect from 27.11.2020, the import duty on crude palm oil was revised from 37.5% to 27.5%.

As per Union Budget 2021-22, the basic custom duty on Crude Palm Oil has been reduced from 27.5% to 15% and that on Crude Soyabean Oil and Crude Sunflower Oil from 35 % to 15 %. An agri-cess of 17.5 % has been imposed on Crude Palm Oil and 20 % on both Crude Soyabean and Crude Sunflower Oil. With this, the effective rate of duty on Crude Palm Oil has increased from 30.25% to 35.75%. In case of Crude Soyabean and Crude Sunflower Oil, the effective rate of duty remains the same i.e. 38.5%.

In order to ensure availability of edible oil in the country, export of edible oil has been banned w.e.f. 17.03.2008, which was extended from time to time. With effect from 06.02.2015, export of ricebran oil in bulk has been permitted. With effect from 27.03.2017, export of groundnut oil, sesame oil, soyabean oil and maize (corn) oil has been permitted. With effect from 06.04.2018, export of all edible oils except mustard oil was made free without quantitative ceiling; pack size etc, till further orders. Export of mustard oil is permitted in packs of up to 5 Kg with a Minimum Export Price (MEP) of USD 900 per MT.

E-GOVERNANCE INITIATIVES

In order to improve and systemize the data management system in the vegetable oil sector, the Directorate of Sugar & Vegetable Oils under Department of Food and Public Distribution has developed a web based platform (evegoils.nic.in) for online submission of inputs by vegetable oil producers on monthly basis. This has helped the Government to take prompt and informed policy decisions for better management of vegetable oil sector. The new system also provides transparency in the data management of the vegetable oil industry as well as Government's working. The portal also provides window for online registration and submission of monthly production returns.

ANIMAL FEED INDUSTRY

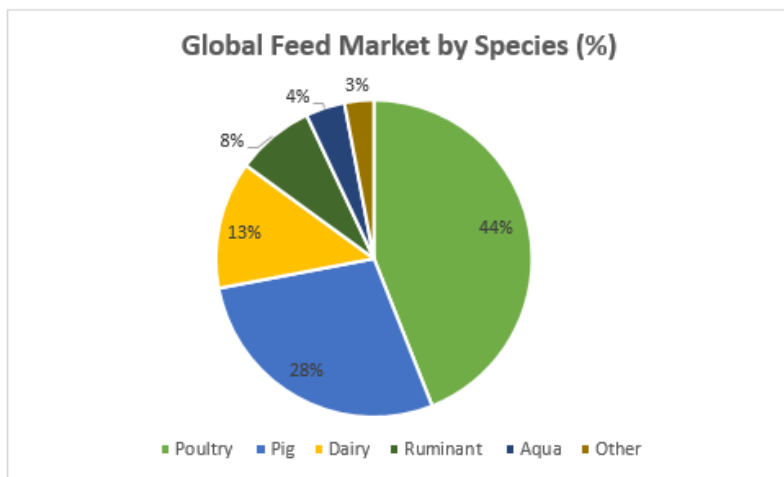

Animal feed is way more than just sustenance for livestock, poultry, and aquaculture—it is the cornerstone of their growth, health, and productivity as well. And now with a burgeoning population and changing dietary habits, it holds huge potential to support future generations and their growing demands of nutrition.

With an estimated value of US\$ 501.9 billion in 2022, the global animal feed market is expected to grow at a CAGR of 3.3%. India being the fourth-largest producer of animal feed, accounted for a US\$ 11.66 billion feed market in 2022. The analysis run by TPCI’s research team reveals opportunity areas for expanding exports.

Animal feed is the food given to domestic animals in the course of animal husbandry. Globally, the feed industry serves a variety of animals including poultry, dairy (cattle, calf, and beef), aquatic/marine, pig, pets etc. The feed demand for different animals varies with respect to socio-cultural dynamics, eating habits and economic importance of animals in the region.

India is glaring at a critical fodder problem over the past few years, according to market reports. According to a recent coverage, India is facing a major challenge in terms of producing adequate feed and fodder for its livestock, given its shrinking land resource. Erratic fodder supply during summer/ drought creates a further gap in the supply chain. The deficit in green fodder is estimated at 11.24%. Currently, fodder is being cultivated on 8.4 million hectares (nearly 4% of gross cropped area), whereas experts suggest a share of 14-17%.

In fact, animal feed is a huge and diverse industry with lucrative growth opportunities across end user segments led by growing demand. TPCI’s research team has undertaken a deep dive into the animal feed industry to ascertain critical growth opportunities for Indian exporters.

In most of the countries across world, the poultry segment occupies a major share of overall feed production volume, according to IFIF, estimates, 2021. The global animal feed market reached US\$ 501.9 billion in 2022 and is expected to grow to US\$ 606.3 billion by 2028, exhibiting a CAGR of 3.3% during this period. The 2023 Altech Agri-Food Outlook revealed that despite significant macroeconomic challenges that affected the entire supply chain, global feed production remained steady 2022 at 1.27 billion metric tons (BMT) in 2022, a decrease of less than one-half of one per cent (0.42%) from 2021’s estimates. Data compiled from more than 140 countries and around 2,800 feed mills revealed that the top 5 feed-producing countries over the past year were:

- China (260.739 million metric tons [MMT])
- The U.S. (240.403 MMT)
- Brazil (81.948 MMT)
- India (43.360 MMT)
- Mexico (40.138 MMT)

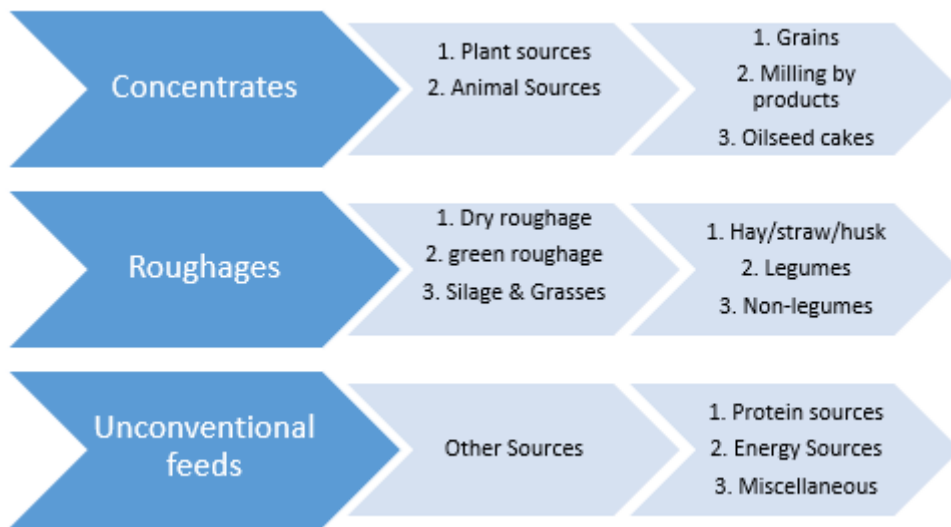

The top 10 countries produced 64% of the world’s feed production. China, the US, Brazil and India account for half of the world’s feed consumption.

According to International Feed Industry Federation (IFIF), commercial feed manufacturing generates an estimated annual turnover of over US\$ 400 billion. The industry continues to expand in volume and value in response to increases in world population, urbanization and growing consumer purchasing power.

The above predictions can be substantiated by the estimates compiled by the Food and Agriculture Organization (FAO), i.e. by 2050, the world has to produce 60 per cent more food to feed a total population of 9.3 billion. Therefore, animal-based protein production is expected to increase along with this increase. OECD-FAO Agricultural Outlook 2021-30, projects the global meat supply to expand over the period, reaching 374 Mt by 2030. Growth in global consumption of meat proteins over the next decade is projected to increase by 14% by 2030 compared to the base period average of 2018-2020, driven largely by income and population growth.

Food grains are the most important source of animal feed globally. Compound feed, which is in high demand as a source of a nutritionally balanced diet, is also being manufactured using advanced lab facilities and under the supervision of nutritionists. The depiction below illustrates different feed types.

Indian Feed Sector

India’s animal feed market has completed its 57 golden years in 2022. The country is known to have one of the largest and fastest-growing compound feed markets in the world. It has built a strong base for compound feeds, which are nutritionally balanced in the form of pellets. It becomes composite with 20% protein and 2-3% fat content.

Feed manufacturing on a commercial and scientific basis started around 1965 in India, with the setting up of medium-sized feed plants in northern and western India. Today, the industry is undergoing a very exciting phase of growth for the next decade. It is classified into three broad categories as shown below, with the poultry feed market showing dominance.

In terms of its share, the aqua feed segment has seen the maximum growth out of the three major segments, despite being a late starter.

Source: Yes Bank Research Report, Indian Feed Industry: Revitalizing Nutritional Security

The Indian feed market grew at 3.5% CAGR over the last 5 years and the size reached Rs 956.7 billion in 2022 (approx. US\$ 11.66 billion), as mentioned in the latest report by IMARC Group titled on Indian Animal Feed Market. There is an expectation for the market to reach Rs 1,578.2 billion by 2028 (~US\$ 19.23 billion) exhibiting a CAGR of 8.2%.

Major feed Markets in India

India has established strong markets for Cattle and Poultry feeds. Both are growing at 15% and 8-9% respectively have grounds for huge potential in future. Cattle feed mainly comprises grains (like jowar, millets etc.) and their cakes, mustard, cotton seeds and their oil cakes, de-oiled rice and soyabean. On the other hand, poultry is mainly fed maize, jowar, wheat, soy and their concentrates.

With being the fourth largest broiler producer and third largest egg producer, India has witnessed 120.6 billion egg production in the FY 2021-22, registering a 6.19% YoY growth. The steady growth of poultry consumption over the last decade has been associated with an increase in animal-based protein intake at affordable prices. This has kept feed consumption growing with the broiler industry being the strongest driver behind this development. The presence of integrators (70% of the total industry) and a shorter production cycle has brought feed-based efficiencies and rationalization to the industry. While poultry integrators are much stronger in regional pockets of Andhra Pradesh, Karnataka and Tamil Nadu, the much larger landscape for the poultry industry and its expansion beyond these belts provide ample opportunity for standalone feed players. The use of compound feed in the layer industry varies from 5 to 25% and is highly underpenetrated which offers plenty of opportunities of growth.

On the same lines, India is the largest milk producer in the world, contributing 24% of global milk production in the year 2021-22. India's milk production has registered a 51% increase during the last 8 years. The level of consumption has been constantly boosting demand for Cattle feed. Western India has been registering the maximum share in cattle feed production followed by North, South and East.

India's aquaculture feed market has also expanded with a CAGR of 3.5% (2017-22) on the basis of the revenue generated. The market stood at a value of around US\$ 1.4 billion in 2020 and is expected to grow at a CAGR of 8% from 2023-28. One of the major determinants of the growth of the aqua feed market in India is attributed to the surging demand for shrimp globally. As of FY 2022, there were approximately 30 high-tech feed mills operating to cater to the rising export and domestic demand. India is the second largest aquaculture country in the world accounting for 8% of global production. With an annual growth of 10.34% in fish production in 2021-22, the sector grew at a CAGR of 8% over the last 8 years.

Established industry players like Anmol Feeds find the Aqua feed industry a pretty under-researched area. For other major Aqua feed manufacturers like UNO feeds, and Avanti feeds, the main problem lies with the procurement of raw materials to produce the feed, especially when the genetically modified soybean and maize are not allowed to be used by the Indian government whereas it is allowed in the other countries like Vietnam and Thailand. Narsimha Rao, Managing Partner, UNO Feeds mentions that it makes it difficult to capture the market since the production gets costly by up to 30-40% and makes Indian exports expensive. According to aqua feed manufacturers, there is a misconception that it creates health issues.

Feed Price: A major deciding factor

The increasing competition with the human diet resulting in less availability of raw materials has forced the manufacturers to shift to other materials along with conventional sources. Due to this, price volatility affects feedstock production. Mr. Parv Badjati, Managing Director, Bharat Feeds mentioned that Maize prices have reached Rs. 19.5 per kg from Rs. 10 to 12 kg years back, causing issues in generating cost-effective feeds. Not only this but Mr. Amit from Godrej Agrovet shares his experience with issues arising in cattle feed raw material procurement. According to him, there is no sync between cattle milk prices and cattle feed prices. This is also being felt for poultry feeds. Exporting maize affects domestic prices in turn affecting the feed price.

Along with nutrient-rich additives, by-products of the ethanol industry i.e DDGS getting utilized in animal feed production (7-10%), according to Mr. Chirag Garg, Director Pro Rich Agro) and is regarded as a star ingredient for future requirements. But the farmers are not well aware of its usage in the feed. Apart from some major players, even the industry has information lacunas.

DDGS is the byproduct produced in ethanol production which contains 90% of water content, i.e. on drying up 1 kg of by-product, only 80-90 grams of DDGS is produced which cost Rs. 28 per kg coming out to be equally costly as the conventional grains.

The wet DGS is easily available to the farmers set up near distilleries and is easily fed due to the cost advantage. But the healthier option, the Dried DGS usually isn't that cost-effective, as drying the matter is a costly affair. Therefore, DDGS does hold the potential to support the conventional methods of feed production with booming grain-based ethanol production in India but the above issues should be taken into consideration to boost the usage.

Mapping potential exports: Product-wise at 6 digit

India is ranked 19th in the world occupying a total of 1.3% share in total exports of the world. According to the analysis, India is ranked 9th in overall exports of the most imported product,

Oil cake and residues of Soybean oil. Global imports by value in 2022 were recorded at US\$ 36.97 billion, out of which India exported US\$ 502.14 million. With the growing prominence of Aquaculture in India, another potential product for India's exports is Flour/meals and pellets of fish and crustaceans, where the country is ranked 11th with US\$ 154.9 million in exports. Global imports were recorded at US\$ 6.3 billion over the same period.

Both these products have been registering positive import CAGR in the world along with a significant share in total imports. With growing demand and India's capacity in production, the two shortlisted products are:

Oilcake and other residues of Soybean oil- (HS 230400)
Flour, meals, and pellets of fish, crustaceans... – (HS 230120)

Way forward

The world's animal feed market is projected to reach new heights within the next five years with the right policies in place. Apart from established partners, Indian industry find huge potential in exports to other nations lacking in native productions like UAE, China, Russia and Brazil. India's share of 1.3% in the world's total exports can be further boosted due to increased domestic and international demand by bringing in some government interventions and increased investments in research and developments for feed manufacturing.

The industry's ongoing demands regarding financial support in the form of subsidies along with uniform implementation of the standards for credible players to stay in the market should be considered. Besides this, the industry is also looking for an unsynchronized regulatory framework. There are restrictions on compound cattle feed regarding nutrient contents, but no such restriction is there on raw materials. This makes it difficult for manufacturers to produce feed, according to the norms.

Compound feed manufacturers are levied with restrictions for the content on protein content (permissible upto 9-10%) and usage of only Non genetically modified products. But no such measures are imposed on the raw materials which are used in compound feed manufacturing. Selecting raw materials according to the standards for compound feed manufacturing is a time consuming process and in turn becomes costly. Similar restrictions on raw materials will be beneficial to the sector.

Our Products:

Maize Oil (Non-edible):

Maize Oil or Corn Oil is extracted from the germ of Maize (Corn). We produce Unrefined (Crude) Maize Oil i.e. 100% expeller pressed Maize Oil. Unrefined Maize Oil contains free fatty acids, phospholipids, volatile compounds, pigments, and other impurities.

To make it edible, the refining companies removes free fatty acids, phospholipids, volatile compounds, pigments, and other impurities from Crude Maize Oil, the refined Maize Oil mainly used in cooking, where its high smoke point makes refined corn oil a valuable frying oil. It is also a key ingredient in some margarines. Corn oil is regarded highly for its functionality, exceptional flavour, affordability, and health benefits. It is high in energy, easily digestible, provides Vitamin E, and is a rich source of polyunsaturated fatty acids, which help regulate blood cholesterol levels and lower elevated blood pressure etc.

Corn oil is also a feedstock used for biodiesel. Other industrial uses for corn oil include soap, salve, paint, erasers, rustproofing for metal surfaces, inks, textiles, nitro-glycerine, and insecticides. It is sometimes used as a carrier for drug molecules in pharmaceutical preparations. Due to its high cost, it is mainly used for edible purpose.

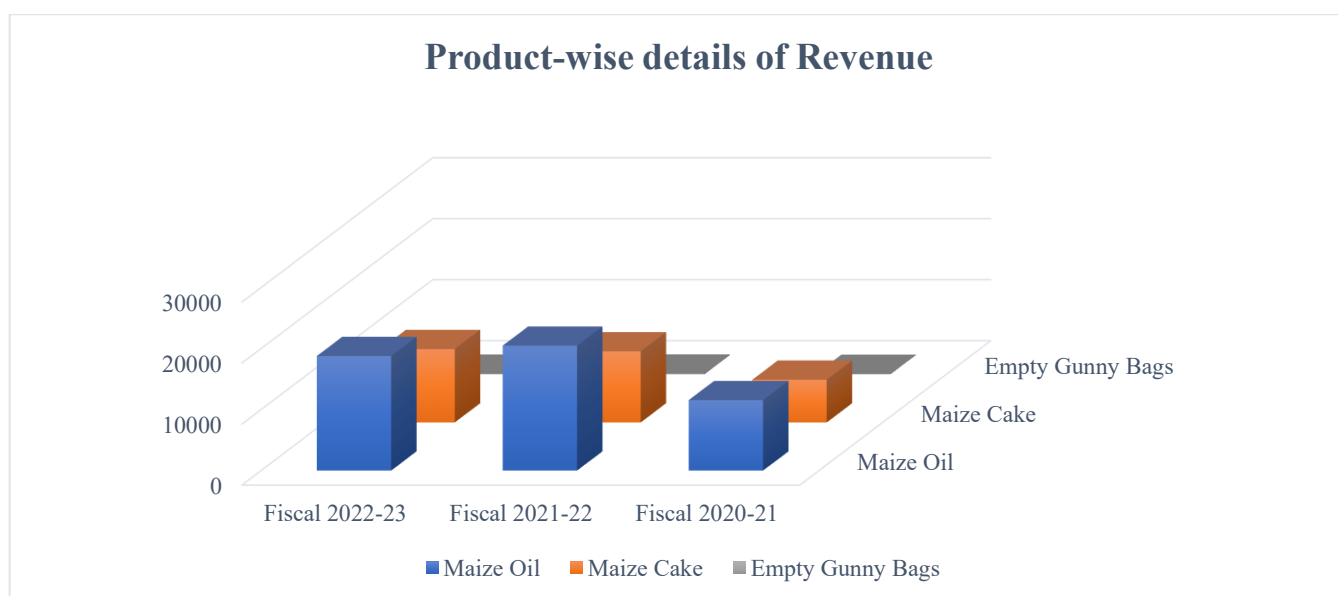

Maize Cake (Cattle Feed):

Maize Cake is the by-product obtained from extraction of Maize Oil which is very high in the fat or oil content. It is processed through the Expeller technology to produce two product namely Maize oil and Maize oil cake. Maize oil cake is rich source of nutrition and is used as a concentrate source in the dairy Cattle feed. The main advantages of this Maize Cake are (1) Increases the milk fat percentage; (2) Higher contain of Oil will provide the energy to the animals; (3) Contains the Vitamin E that is highly beneficial in the induction of heat in early period of the calving; (4) Improves the animal health and resistance power against the diseases; (6) contains unsaturated fatty acid that will help for the early pregnancy of the animals etc.

Flow Diagram of our Manufacturing Process

Manufacturing Process:

Raw Material:

The raw material for the Maize Oil Plant is Maize Germ. Germ is one of the ingredients of Maize which is separated in Maize crushing process. Maize Germ is the endosperm of Maize grain; it is a yellow-coloured seed, pleasantly nutty in taste and rich in oil. It is mainly used for extraction of maize oil and manufacturing of feed supplement. Maize Poha/Maize Bran/Sludge Kitu is also mixed with Maize Germ to create a final feed ingredient and also acts as a binding agent for production of Maize Cake.

Cleaning:

The Maize Germ entering the oil plant inevitably carry some impurities such as Dust, Stone, Metal Particles etc. These impurities can not only affect the quality of oil and oil cake, but also will absorb part of the oil and reduce the oil yield of oil press machine. Moreover, sand, stone, metal particles in the germ, will cause wear and tear of the parts of the screw maize oil expeller, even lead to production accident. Therefore, in order to ensure the smooth production of maize oil, impurities must be removed as far as possible. There are many methods of cleaning, which can be used according to the situation of impurities.

Expelling:

Expelling is the most commonly used oil extraction technology for Maize Germ. The production process of screw oil pressing keep the original flavour of Maize. The produced Maize oil (Crude Oil) is a kind of natural food, featured of mellow fragrance, rich in nutrition ingredient, long shelf life, and without any additives. Crude Maize Oil moves into Ground Oil Tank for filtration. The By-product Maize Cake moves through Conveyor belts for packaging.

Separation and Filtration:

The Crude Maize Oil in Ground Oil Tank contains suspended particles which is then removed by filter press. Decanter separates continuously solid materials from liquid and therefore plays an important role in filtration process. The filtered crude oil then moved to Oil Tank for Storage and filling to oil tankers for transportation. The separated residue is also sent for job work to process the residue into powder form and again the powder form is mixed with Raw material for further processing.

Testing:

Testing of Raw Material i.e. Maize Germs is very much necessary and important factor for an Oil Processing Unit. After receiving the raw material i.e. Maize Germs, the Maize Germs are sent for Lab Testing to check its moisture, oil, fibre and free fatty acids in the Germs and on the basis of test reports, we mix Maize Poha/Maize Bran/Sludge Kitu with the Raw material to obtain quality Maize Oil and Maize Cake. After production, Maize Cake is also sent for Lab Testing to check its Oil and moisture content in the Maize Cake.

The draft however exempts organic food marketed through direct sale by the original producer or producer organization to the end consumer from verification compliance, but this exemption does not apply to processed organic products.

FOREIGN INVESTMENT RELATED LAWS AND REGULATIONS

Foreign investment in Indian securities is governed by the provisions of the Foreign Exchange Management Act, 1999 (FEMA) read with the applicable FEM Rules. FEMA replaced the erstwhile Foreign Exchange Regulation Act, 1973. Foreign investment is permitted (except in the prohibited sectors) in Indian companies, either through the automatic route or the government approval route, depending upon the sector in which foreign investment is sought to be made. The DIPP (now DPIIT) makes policy pronouncements on FDI through press notes and press releases which are notified by the RBI as amendments to the FEM Rules. In case of any conflict, the FEM Rules prevail. Therefore, the regulatory framework, over a period of time consists of acts, regulations, press notes, press releases, and clarifications among other amendments. The DIPP (now DPIIT) issued the FDI Policy which consolidates the policy framework on FDI issued by DIPP (now DPIIT), in force on August 28, 2017 and reflects the FDI policy as on August 28, 2017. The FDI Policy consolidates and subsumes all the press notes, press releases, and clarifications on FDI issued by DIPP (now DPIIT). As per the FDI Policy, FDI up to 100% is permitted in wholesale trading under automatic route and up to 51% is permitted in multi brand retail trading under the government route subject to certain conditions prescribed under FDI policy. As per the Press Note No. 3 of 2020 dated April 17, 2020 issued by the DIPP, has amended the FDI Policy to include restrictions on entities belonging to a country, which shares land border with India or where the beneficial owner of an investment into India is situated in or is a citizen of any such country, where they can invest only under the Government route. Further, a citizen of Pakistan or an entity incorporated in Pakistan can invest, only under the Government route, in sectors/activities other than defence, space, atomic energy and sectors/activities prohibited for foreign investment.

The Foreign Exchange Management Act, 1999

Foreign investment in India is primarily governed by the provisions of the Foreign Exchange Management Act, 1999 (FEMA) and the rules, regulations and notifications thereunder, as issued by the Reserve Bank of India from time to time. The RBI, in exercise of its power under the FEMA, has notified the Foreign Exchange Management (Mode of Payment and Reporting of Non-Debt Instruments) Regulations, 2019 by Notification No. FEMA. 395/2019-RB dated October 17, 2019 (FEMA Rules) to prohibit, restrict, or regulate transfer by or issue security to a person resident outside India. As laid down by the FEMA Rules, no prior consents and approvals are required from the RBI for Foreign Direct Investment (FDI) under the —automatic route within the specified sectoral caps. In respect of all industries not specified as FDI under the automatic route, and in respect of investment in excess of the specified sectoral limits under the automatic route, approval may be required from the RBI. At present, the FDI Policy does not prescribe any cap on the foreign investments in the sector in which the Company operates. Therefore, foreign investment up to 100% is permitted in the Company under the automatic route.

Phased implementation of Unified Payments Interface (UPI)

SEBI has issued the various UPI Circulars in relation to streamlining the process of public issue of inter alia, equity shares. Pursuant to the UPI Circulars, the UPI Mechanism has been introduced in a phased manner as a payment mechanism (in addition to mechanism of blocking funds in the account maintained with SCSBs under ASBA) for applications by Retail Individual Investors through Designated Intermediaries with the objective to reduce the time duration from public issue closure to listing from six Working Days to up to three Working Days. Considering the time required for making necessary changes to the systems and to ensure complete and smooth transition to the UPI payment mechanism, the UPI Circulars have introduced the UPI Mechanism in three phases in the following manner:

Phase I: This phase was applicable from January 1, 2019 until March 31, 2019 or floating of five main board public issues, whichever was later. Subsequently, the timeline for implementation of Phase I was extended till June 30, 2019. Under this phase, a Retail Individual Investor had the option to submit the ASBA Form with any of the Designated Intermediary and use his/her UPI ID for the purpose of blocking of funds. The time duration from public issue closure to listing continued to be six Working Days.

Phase II: This phase has become applicable from July 1, 2019. SEBI vide its circular no. SEBI/HO/CFD/DCR2/CIR/P/2019/133 dated November 8, 2019 had extended the timeline for implementation of UPI Phase II till March 31, 2020. Further, SEBI vide its circular no. SEBI/HO/CFD/DIL2/CIR/P/2020 dated March 30, 2020 decided to continue Phase II of UPI with ASBA until further notice. Under this phase, submission of the ASBA Form by Retail Individual Investors through Designated Intermediaries (other than SCSBs) to SCSBs for blocking of funds will be discontinued and will be replaced by the UPI Mechanism. However, the time duration from public issue closure to listing would continue to be six Working Days during this phase.

Phase III: The commencement period of Phase III is yet to be notified. In this phase, the time duration from public issue closure to listing is proposed to be reduced to three Working Days. For further details, refer to the General Information Document available on the websites of the Stock Exchanges and the Managers.

RESTRICTIONS OF FOREIGN OWNERSHIP OF INDIAN SECURITIES

There are two routes through which foreign investors may invest in India. One is the “automatic route”, where no government approval is required under Indian foreign exchange laws to make an investment as long as it is within prescribed thresholds for the relevant sector. The other route is the “government route”, where an approval is required under foreign exchange laws from the relevant industry regulator, prior to the investment.

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991, of the Government of India and FEMA. While the Industrial Policy, 1991, of the Government of India, prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. The Union Cabinet, as provided in the Cabinet Press Release dated May 24, 2017, has given its approval for phasing out the FIPB. Under the Industrial Policy, 1991, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. Accordingly, the process for foreign direct investment (“FDI”) and approval from the Government of India will now be handled by the concerned ministries or departments, in consultation with the Department for Promotion of Industry and Internal Trade, Ministry of Commerce and Industry, Government of India (formerly known as the Department of Industrial Policy and Promotion) (“DPIIT”), Ministry of Finance, Department of Economic Affairs, FIPB section, through a memorandum dated June 5, 2017, has notified the specific ministries handling relevant sectors.

The Government has, from time to time, made policy pronouncements on FDI through press notes and press releases.
